 In physics, resilience is the ability of an elastic material (such as rubber or animal tissue) to absorb energy (such as from a blow) and release that energy as it springs back to its original shape. The recovery that occurs in this phenomenon can be viewed as analogous to a person's ability to bounce back after a jarring setback.

Resilience | Definition of Resilience by Merriam-Webster
 Resilience is the psychological quality that allows some people to be knocked down by the adversities of life and come back at least as strong as before.
